

Finding and Installing a New Theme for Your WordPress Blog

1. Go to either <http://WordPress.org/extend/themes> or search “WordPress themes” in Google and find a theme you like and that will work with your blog
2. Be sure to choose a “Widget Ready” theme.
3. You can preview the theme and if you like it...
4. Download the .zip file for the theme and save it to your desktop.
5. Extract the files in the .zip folder by right-clicking and then clicking “extract.”
6. Open your .ftp program.
7. Upload the theme to your wp-content/themes folder
8. Log into your blog and go to “Design.”
9. You’ll see the new theme
10. Click on it to see how it will look on your blog.
11. If you’re satisfied, click “Activate this theme.”
